Company Profile

Started with its first stapler used in China in 2013, Fengh has since then been witnessed a rapid growth, not only in sales in a continuously increasing number of countries on every continent, but also in such new value-added endeavors as technical innovation and procedure development.

Fengh has consistently invested a double-digit percentage of its annual revenue in technical innovations over the past 5 years. Now with a couple of dozen patents granted and more than 200 innovations filed, Fengh has successfully emerged as a leading innovation-driven enterprise in China, committed to researching, developing, manufacturing and marketing products for minimally invasive and laparoscopic surgery procedures.

Rooted in China, the biggest developing economy with a significantly large portion of its population aging and/or in poverty, Fengh understands how important it is to offer healthcare professionals and ultimately patients, the products and solutions well balanced with good quality and more affordable price. To that end, Fengh has been taking tremendous effort to consolidate its supply chain in different countries, streamline its state-of-the-art manufacturing facilities and enhance its quality management systems in Wu Xi, Su Zhou and Shang Hai, the most advanced areas in China. Today, tens of thousands of healthcare professionals and patients around the world are benefiting from Fengh's products, which they are happy with and we are proud of.

Focus on quality, invest in innovations and care about patients! This is the fundamental credo that keeps growing Fengh.

Let us grow together with a growing Fengh.

Ultrasound Activated Scalpel System

- **Intelligent**

- Works intelligently, adjusting the energy output according to different tissue, better performance of cutting and coagulating
- Self inspection guarantees safe surgical operation

- **Effective**

- Finish cutting and coagulating at same time
- Made of higher grade materials, easy to hold and operate, multi-functionality in a single device

- **Safe**

- CE certificate
- Able to deal with 5mm vessels
- No electricity in body
- Main Unit runs stably, guaranteeing shears work safely and offer outstanding clinical performance

- **Precise**

- Less injury to tissue

Founded in 2010, Hocer Medical is one of the leading providers of ultrasound surgery systems in China. Headquartered in Beijing China, Hocer Medical also possesses R&D subsidiaries in Virginia USA, manufacturing facility in Tianjin, sales and marketing office in Shanghai. Hocer Medical developed the ultrasound surgery system iScalpel™. These products are widely used in clinical surgery. All these products have CE certificates.

iScalpel
